Exclusive features

Every issue we pack the magazine with exclusive bespoke features, covering...well, everything under the sun. Whether it's a deep dive behind-the-scenes of a huge upcoming title, or an in-depth chat with legendary game developers of yester-year, or an informative breakdown of today's hot topic, or a collection of opinions and stories from some of games journalism's best writers, you can rest assured it'll be a riveting read and visually sumptuous, too.

Best game preview

With our industry-leading access, we get the full scoop on the most exciting upcoming games every month. With our in-depth developer interviews and expert hands-on impressions, you can trust our previews to keep you informed and give you an early peek into blockbuster titles and undiscovered indie darlings alike.

Expert Hardware guide

No one knows gear like we do. Our dedicated hardware team tests and reviews every part they can to bring you comprehensive guides to what to buy and when. Every issue features expert build guides, aimed at giving you the best gaming experience at every level of budget, as well as reviews, features, and even the latest news and discoveries from the world of computer technology.

“For the TBG's 5 awards, we've carefully selected a whole year's worth of the best games you'll want to try!”

First of all, I would like to thank you for your subscription. Games have evolved at a rate we could not have imagined twenty years ago, from simple graphics and ear-splitting sound effects to indistinguishable visuals and top-notch soundtracks. The voice of the player has always been paramount in the evolution of gaming, and without feedback from players, authors would not be able to produce truly artistic games, which is why The Best Game Awards were created in the first place. We hope to speak for

players in the annual selection and to achieve the goal of setting an industry benchmark by awarding the best games. Looking at it now, I think we have done it, the game that won the TBG award is proud to win the award, and other game industry leaders are also working hard to win the TBG, we have successfully passed the voice of the players to the authors. This annual magazine is in its fifth year since the inception of the TBG Awards. For this edition of the Offworld Annual, our team and professional games journalists and supporters from our online forum have voted for our top games. We've picked out what we think is the best. Hope you enjoy these remarkable games and enjoy your wanderings in Offworld!

Game of the Year

As the winner of Game of the Year, "Death Stranding Director's Cut" truly stands out among the nominees. The open world, filled with breathtaking landscapes and immersive gameplay, kept me captivated for hours on end. The story, while complex and thought-provoking, was expertly told and kept me invested until the very end.

The other nominees all offered unique and memorable experiences in their own right. "Elden Ring" captivated me with its engaging combat and immersive world-building, while "A Plague Tale: Requiem" drew me in with its emotive storytelling and intense action. "Stray," with its stunning visuals and innovative gameplay, left a lasting impression as well.

Overall, "Death Stranding Director's Cut" was a standout experience that thoroughly deserves the title of Game of the Year.

A PLAGUE TALE: REQUIEM

Made by: Asobo Studio

Set directly after the events of A Plague Tale: Innocence, An organization of alchemists called the Order has promised to provide refuge to the de Rune family. However, they encounter a hostile family of beekeepers who attempted to kill him, Amicia, and the youngest sibling of that family, forcing him to call the rats to save all three of them.

STRAY

Made by: BlueTwelve Studio

Lost, alone and separated from family, a stray cat must untangle an ancient mystery to escape a post-apocalypse robot city. Stray is a third-person cat adventure game set amidst the detailed, neon-lit alleys of a decaying cybercity and the murky environments of its seedy underbelly. See the world through the eyes of a cat and interact with the environment in playful ways, accompanied by a small flying drone, the duo must find a way out.

Elden Ring

Made by: FromSoftware Inc.

The new fantasy action RPG game. Rise, Tarnished, and be guided by grace to brandish the power of the Elden Ring and become an Elden Lord in the Lands Between.

A vast world where open fields with a variety of situations and huge dungeons with complex and three-dimensional designs are seamlessly connected.

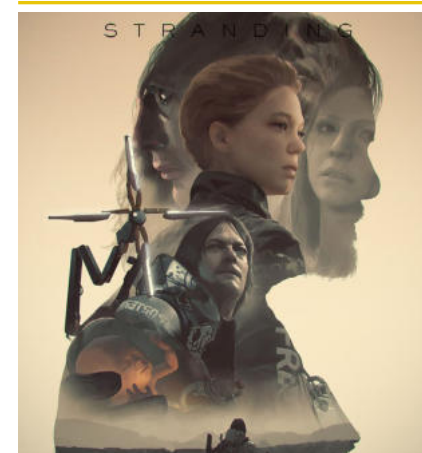

In addition to customizing the appearance of your character, you can freely combine the weapons, armor, and magic that you equip. You can develop your character according to your play style, such as increasing your muscle strength to become a strong warrior, or mastering magic. An epic story set in a mythical world will be told in fragments via multiplayer views.

DEATH STRANDING: DIRECTOR'S CUT

Made by: KOJIMA PRODUCTIONS

From legendary game creator Hideo Kojima comes a genre-defying experience, now expanded in this definitive DIRECTOR'S CUT.

In the future, a mysterious event known as the Death Stranding has opened a doorway between the living and the dead, leading to grotesque creatures from the afterlife roaming the fallen world marred by a desolate society. As Sam Bridges, your mission is to deliver hope to humanity by connecting the last survivors of a decimated America. Can you reunite the shattered world, one step at a time?

In the early and middle stages of the game, players can only use their feet to cross mountains and rivers. The declining physical strength and the risk of falling if you are not careful all made the player feel the difficulty of the journey.

However, in the later stage, when all areas are connected to the Chiral network, you'll be able to build buildings freely, and you can also see the buildings built by other players. The director's cut version adds more vehicles, more mechanisms, and more mechanism and combat system to make it even better. From being unfamiliar and nervous about the vast world to getting familiar with every inch of land and building buildings with other players, nothing is more convincing than the final sense of accomplishment.

Zhou
Wenhao

Best Narrative

God of War and Ragnarok round out the nominees for Best Narrative Game. The immersive and beautifully crafted world, coupled with exciting combat and a compelling story, kept me hooked from start to finish. Unlike previous Gods of War, players face a healthier and more independent Atreus. As an elderly father, Kratos gradually recognized Atreus' ability, which was naturally displayed in front of the player and aroused the resonance of the player.

The other nominees, "Elden Ring," "A Plague Tale: Requiem" and "Immortality" also all offer unique and memorable experiences.

Elden Ring

Made by: FromSoftware

Elden's Circle is an action RPG game set in an orthodox dark fantasy world. Walk into the vast scene and underground labyrinth to explore the unknown, challenge difficult and dangerous situations, and enjoy the sense of accomplishment when overcoming difficulties. Not only that, the group portrait drama composed of the stakes between the characters on stage is not to be missed.

IMMORTALITY

Made by: Sam Barlow

Discover the film that Marissa Marcel left behind! When John Durick wrote the thriller Minsky, he had Marcel in mind. Set in New York, the story follows the death of a famous artist, with Marissa playing the muse suspected of his murder. In Durick's final project, he teamed up again with Marcel, bringing her back to the screen after a long hiatus. The film Two of Everything is a subversive thriller that explores the binary relationship between a successful pop star and her double.

Plague Tale: Requiem

Made by: Asobo Studio

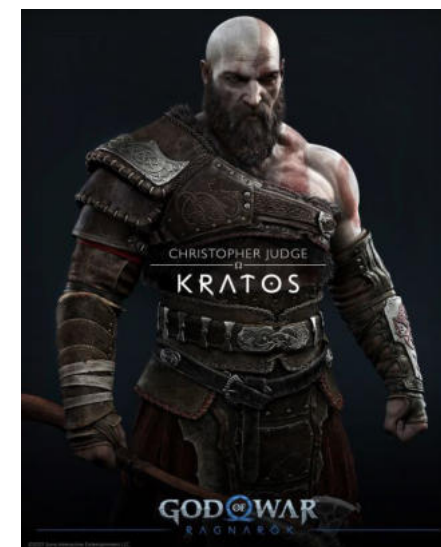

Enter the cruel world full of visions but it is breathless, and embark on a sad and heart-wrenching journey. At all costs, just to survive and save the one you love, feel the entanglement and pain in it. Use a variety of weapons, tools, and unusual abilities to sneak in or launch a terrifying offensive.

At all costs, just to survive and save the one you love, feel the entanglement and pain in it. Take advantage of a variety of weapons, tools and unusual abilities, sneak attack or launch a terrifying offensive to defeat one opponent after another and overcome one difficulty after another.

God of War Ragnarök

Made by: SIE Santa Monica Studio

In 2018, the Santa Monica studio achieved a true 3-in-1 of one of PlayStation's most famous franchises with the release of God of War: From the Ashes, and while it's obviously easy to address the ever-changing mythology, it still manages brilliantly. made it happen, won Narrative of the Year, and eventually started the trend of the so-called "Daddy Game," by retelling the narrative of Kratos' son Atreus, who accompanies and guides him throughout his journey. assist him.

In combat, it doesn't take long for the main character to be tested by ordinary O'Points and some notable personalities from Norse mythology. The balance between action and storytelling isn't as well-crafted as

it was in the 2018 games, and the game begins with a clearer path, but the uncertainty of Ragnarok's story leaves room for plenty of surprises, turning it into possibility and A roller coaster with twists and turns.

These narrative arcs center around Kratos and Atreus, but involve many other characters and intersect during Ragnarok's journey. Like the emotions elicited by father-son relationships at life stages such as adolescence, development is more complex and disordered, and this has an effect on the pace of the game, which in a narrative that talks about power isn't mathematically like the first Squared, but not the least spectacular, Duty, Father, Faith and Will.

Kong
Jincan

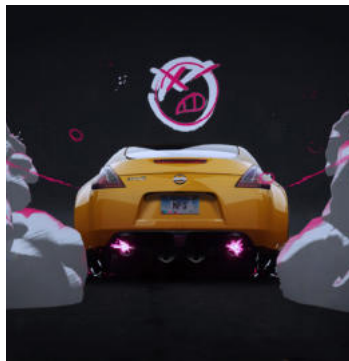

Best Sports/Racing

Among the many sports/racing games nominated this year, Forza Horizon stood out and took home the TBG Best Sports/Racing Award, with an unprecedented open world, great freedom, top-notch graphics combined with excellent handling and fun gameplay, Forza Horizon 5 has managed to become the most popular racing game. Not only that, but the most successful aspect of Forza Horizon 5 is its balance between professionalism and entertainment. Horizon 5 may not be the best in one aspect of this year's nominations, but it is definitely the most balanced. For players who have not been exposed to such games, Horizon is an absolute must-see introductory game.

NEED FOR SPEED UNBOUND

Made by: Criterion Games

No other racing game released this year looks quite like Need for Speed Unbound. Criterion has gone all-in with wild, animated visual flair that often appears as though it's been lifted from the pages of a comic book. The result is a uniquely styled racer that regularly looks quite fabulous in motion, though its grating story mode goes over like a banana in the tailpipe and the online mode simply feels stripped down and unfinished.

WRC GENERATIONS

Made by: Kylotonn

With the WRC license Scandinavian flicking itself to EA in 2023, WRC Generations may represent the last official effort developed by KT Racing for now – and the studio has certainly shot the works at it. The culmination of a seven-year stint on the series, WRC Generations combines gorgeous effects and great handling with the most generous selection of rally stages I've seen anywhere.

RIDERS REPUBLIC

Made by: Ubisoft Ancecy

Rider's Republic aims to cram the engine of a high-octane arcade racer under the hood of a sprawling online open world – except this time the engine is your legs and the hood is a bunch of extreme sports events so over the top it would make the late '90s blush. Although it may be a familiar formula, but

it overwhelmingly succeeds at providing the ultimate downhill sports fantasy. Whether I was blasting into the sky in my rocket-powered wingsuit or sweating bullets as I completed obstacle courses on my bike, Riders Republic awoke the extreme sports fanatic inside me and kept me hooked for over 60 hours and counting.

TBC
2022
AMRAD

FORZA HORIZON 5

Made by: Playground Games

As Forza Horizon 5 crosses the finish line, the bar for open-world racing has again been raised in so many different ways. A map of Mexico that's bigger, higher, and wildly more varied than any Horizon game yet.

An enormous visual upgrade, especially to lighting, tyre smoke, and dust effects. Hundreds and hundreds of new custom parts, rims, and performance mods, and cars with more character than ever. Drastic sound improvements, better handling, more granular preferences and options, more online activities. It really is incredible across the board.

Not just that, but Playground Games had taken the impeccable open-world racing of all the Horizon games to date, then stuffed in simulated seasons, a shared-world multiplayer overhaul, and a shift in how the team told

their mini automotive stories. But that was day one; Playground then spent another three years cramming in even more things to do. The Festival Playlist, where new activities were available every week. The Eliminator, Horizon's very clever and effective take on bringing the battle royale format to a racing game. The Super7, where we could participate in custom-built racing, driving, and stunt-based challenges made by others, plus create and share our own.

VAMPIRE SURVIVORS

Made by: poncle

Vampire Survivors is a 2D action roguelike developed and published by poncle where you must survive an endless onslaught of monsters, all while levelling up, unlocking new weapons/combos and rescuing new survivors.

As a time survival game with minimalistic gameplay and roguelite elements, all gamers can do is survive as long as gamers can until death inevitably puts an end to the struggles. Gamers may also gather gold in each run to buy upgrades and help the next survivor. It is a very simple game that is very easy to get into but it also provides a decent challenge to keep things interesting.

Vampire Survivors does not really have a story. Gamers are dropped into a location, and monsters start

spawning in and surround. The core gameplay is rather simple, but the sheer amount of customization is great among the comparisons. Each survivor comes with a different weapon and a passive effect and it is almost guaranteed that gamers will find a character that just “clicks” with the build/approach you want to take.

CRITTERS FOR SALE

Made by: Sonoshee

A hybrid between Point And Click and Visual Novel, the game is a compilation of 5 short stories: Snake, Goat, Monkey, Dragon, and Spider. All of which occur in different eras and locations, touching on themes like time travel, black magic, and immortality. Lo-fi aesthetic combining the psychedelic story telling, the actions and choices you make throughout the game influence the outcome of each episode, ultimately leading to gamers' death or survival.

TEARDOWN

Made by: Tuxedo Labs

Teardown features a fully destructible and truly interactive environment where player freedom and emergent gameplay are the driving mechanics.

Tear down walls with explosives or vehicles to create shortcuts no one thought was possible. Stack objects, build structures, or use floating objects to your advantage. Take your time to create an efficient path through the level, plan the heist and get ready to execute it.

RETROWAVE

Made by: RewindAPP

The Retrowave is very much inspired by the '80s, but is mostly an idealized futuristic version of the '80s.

This game offers the player the unique experience of being immersed in this world of Neon lights, palm trees, synthwave, '80s supercars speeding down an endless highway.

Listening to Synthwave / Retrowave most people have had this feeling of nostalgia for an era they didn't know or that never existed. Retrowave offers above all a visual and sound experience that will delight fans of the genre and will surely make those who don't know it yet discover this wonderful universe.

TBG Award

Judges' Notes

Wu
Yanzhou

Best Indie Game

After playing all of the nominated indie games, I have decided that Vampire Survivors is the best indie game of the year. What should "indie" be like? No need for magnificent graphics or burning budgets, only good and easy entertainment, intentional and chic ideas. When you are gaming, at first Vampire Survivors might feel tad slow and doesn't get far, but little by little progress gets better, items start to evolve and soon your characters are pooping such damage numbers that enemy masses keep vanishing in the wind. A completely different, pioneering indie game. Worth a real award.

Call of Duty® | Modern Warfare II

Made by: Infinity Ward

Ah, Call of Duty – one of my favorite signs of autumn. There's something to be said about familiarity, and Modern Warfare II, in spite of its re-re-return to present-day shooting, is recognizable and comfortable from the first second you log in to play your first round of the multiplayer. The maps are great, and everything just feels a little quicker and tighter. Team Deathmatch and Domination return, and despite all the rules being effectively the same I actually really like how Domination games play out now, as opposed to last year. Sound design this year is really good, and I was able to hear enemies running up on me even on my TV set up. In the past, I had a hard time identifying footsteps

without using headphones. Call of Duty: Modern Warfare is the most fun I've had in CoD multiplayer in a good long while. It's taken what was already a mechanically solid multiplayer game and improved on it with a weapon customization system that's almost limitless in its possibilities, and its new focus on bigger maps with tons of players has paid off bigtime. The giant Groundwar and Invasion maps have struck a fantastic balance between hectic and manageable, giving them a feeling of controlled chaos, and the cooperative Spec Ops missions are a treat to play through. That's on top of the usual load of modes, and they all let the excellent, weighty gunplay shine. It's been great, and the constant stream of unlocks are a really effective carrot on a stick that keep me interested moving forward.

CALL OF DUTY®
MODERN WARFARE® II

MAIN FEATURE

TBG Award

Judges' Notes

Yang Zihan

Best Multiplayer

Among the nominees, "Call of Duty Modern Warfare II" stands out as the Best Multiplayer Game of the Year. I kept coming back for more because of the intense gameplay, numerous weaponry and customization choices. The other nominees also provided fun multiplayer experiences. In contrast to "Overwatch 2," which featured a wide variety of playable characters and special powers, "Total War: WARHAMMER III" impressed with its massive battles and in-depth strategy gameplay. "MultiVersus" stood noticed thanks to its unique approach to multiplayer competition. Trust me, it's really hard to pick a winner from these excellent multiplayer games. They are all worth playing.

Total War: WARHAMMER III

Made by: Creative Assembly

Creative Assembly's bid to expand on the firm foundations of Warhammer 1 and 2 hasn't just taken the series to new heights. By framing Total War's sprawling sandbox within a focused, narratively-charged campaign, Warhammer 3 is better-paced and more cinematic. All the best elements of the series are there –colorful fantasy factions, varied tactical opportunities, and a world-shattering scale – only this time, they're even more enjoyable.

MultiVersus

Made by: Player First Games

Few companies have the wealth of recognizable and exciting characters required to create a platform fighter that could rival the likes of Nintendo's Super Smash Bros. series. MultiVersus is a brand-new, free-to-play platform fighter that lets you team up with or against your friends using some of the world's most iconic characters including Batman, Shaggy, Superman, Bugs Bunny & more. Use unique co-op abilities, find your favorite fighters, and save the Multiverse!

Overwatch 2

Made by: Blizzard

The excitement and enjoyment I have had with Overwatch 2 is exactly how I remembered the first game when it launched. The newness, the want to experiment, and to stay up late playing with teams. Yes, it's teams of five now, but honestly, along with the new maps, heroes, and old hero tweaks feels exactly

like what the game needed to become fresh again. Even the new "push" mode feels exciting and just a bit different, requiring you to fight for control of a robot and attempt to get the most distance "pushed" in order to win a round. It's a wonderful shooter full of depth, with unique heroes to master, maps to learn, and hours of your life to enjoy.

Resident Evil

Exploring Mikami Shinji's horror world

While the Resident Evil games don't begin, chronologically, until the late '90s, the events leading up to that first night in the Spencer Mansion actually bring us all the way back to the discovery of the Progenitor virus in the 1960s.

Before Games...

Virologists Edward Ashford, James Marcus, and Oswell E. Spencer cultivated the Progenitor virus and found Umbrella Pharmaceuticals in 1968. Spencer then design and construct the Spencer Mansion. The same year Umbrella was founded, the company built the Umbrella Executive Training Center in the Arklay Mountains, whcih Dr. Marcus reluctantly took over as director. Dr. Marcus mostly used the position for his Progenitor virus research, whcih mad Spencer unhappy.

In 1978, after student virologists William Birkin and Albert Wesker joined the training facility, Dr. Marcus create the t-Virus which can turn those infected into zombies. That same year, Spencer shut the training facility down and moved Wesker and Birkin to the Arklay Laboratory. In 1988, Wesker assassinate Dr. Marcus on Spencer's orders and Birkin begin his research on the first Tyrant.

In 1993, Birkin officially transferred his G-virus program, approved by Spencer, to the Raccoon City Underground Laboratory, or NEST. Police chief, Brian Irons, began receiving bribes from them in exchange for his silence over Umbrella's illicit operations beneath the city.

In 1996, the Raccoon City Police Department establishes the S.T.A.R.S. (Special Tactics and Rescue Service) division, headed by Wesker.

And the story begins...

Resident Evil Zero + Umbrella Chronicles: Beginnings

In July 1998, the Umbrella-owned train The Ecliptic Express comes under attack by a swarm of t-Virus infected leeches, infecting everyone on board.

Bravo Team S.T.A.R.S. officer Rebecca Chambers discovers the train after her team's helicopter crash lands on the way to investigating some grisly murders in the mountains outside of Raccoon City. After meeting up with convict Billy Coen, the pair end up at the Umbrella abandoned facility. At the facility, Rebecca and Billy discover that Dr. Marcus was responsible for the t-Virus

During this period, Wesker and Birkin realize they can't contain the unleashed virus. Birkin decides to blow up the facility. Rebecca meets up with her team captain, Enrico Marini, who informs her of an old mansion where the rest of the Bravo team are planning to meet up.

Rebecca and Billy are reunited and eventually meet up with Queen Leech, Marcus' final experiment, who entered his body and reanimated it, imbuing itself with all of Marcus' knowledge and memories. After killing Queen Leech once and for all, the building self-destructs. After escaping, Rebecca gives Billy his freedom and heads towards the mansion to find her fellow S.T.A.R.S. members. Wesker also head towards the mansion separately.

Chronicles: Rebirth

On July 24, 1998, the S.T.A.R.S. Alpha team is sent out to figure out what happened to the Bravo team. After landing, S.T.A.R.S. member Joseph Frost is killed by a mutant dog, prompting pilot Brad Vickers to flee in the helicopter.

Jill Valentine, Chris Redfield, Albert Wesker, and Barry Burton make a mad dash to a mansion spotted in the woods. After exploring, Jill/Chris eventually uncovers the fact that the Umbrella Corporation was behind the illegal experiments.

Jill/Chris eventually makes their way down to an underground lab, where they discover that Albert Wesker was the aforementioned traitor. Wesker infects himself with a mutant strain of the T-Virus and release the B.O.W Tyrant. The team defeats the Tyrant with the help of Brad, who heroically returns with a rocket launcher and the escape helicopter just in time. Thanks to the T-Virus running through his body, Wesker survives and eventually joins Umbrella's rival organization as planned.

Resident Evil 3: Nemesis

Immediately after the events of the "Mansion Incident," the remaining members of S.T.A.R.S. return to Raccoon City to demand an official investigation into Umbrella, which colluding Chief Irons rejects. Chris, Jill, Rebecca, and Barry to decide to go rogue and investigate the Umbrella conspiracy themselves, with Chris heading off to Europe solo and Jill staying in the city to learn more about Umbrella's secret underground lab.

In September 1998, Raccoon City becomes overrun with zombies after the T-virus contaminates its water supply, infecting much of its population. Umbrella sees the outbreak as an opportunity to test its new bioweapons, and sends down the experimental B.O.W., Nemesis T-Type, with a mission to kill off surviving S.T.A.R.S. members.

Resident Evil 2

While Jill tries to survive the outbreak, rookie R.P.D. officer Leon S. Kennedy and Chris Redfield's younger sister Claire both arrive in Raccoon City. After meeting and pairing up to survive a zombie attack, the two are almost immediately separated by a car accident, so Leon and Claire agree to meet up at the police department. Unfortunately, the building is also infested by zombies. Claire runs into Sherry Birkin, a young girl being pursued by a monstrous weirdo who turns out to be her Dad and Umbrella leading scientist, William Birkin.

Turns out ol' Billy B had planned to betray Umbrella and sell his new G-virus but was gunned down by Umbrella. Before dying, William managed to infect himself with the G-Virus and allowed the virus to spread into Raccoon City through the water system.

Meanwhile, Leon runs into Ada Wong, an FBI agent who's looking to obtain the G-Virus to prove Umbrella's corruption. In the sewers Leon and Ada run into William's wife Annette, who is... not a big fan of law enforcement, to say the least. Leon and Ada chase her to a secret Umbrella underground facility called NEST in pursuit of the G-Virus.

Claire also arrives at NEST in search of a vaccine for a now infected Sherry. Leon manages to obtain the G-Virus sample but runs into Willam, who in his freakish form mortally wounds his wife. Annette tells Leon that Ada is actually a mercenary who's looking to sell the G-Virus to the highest bidder. Ada demands the G-Virus, But before Leon can hand it over, Annette manages to shoot Ada. She falls to her death, dropping the G-Virus sample.

Claire finds the vaccine and gives it to Annette to cure her daughter while she tangles with William. Sherry is cured, but Annette eventually dies of her injuries. The facility is set to self-destruct, and Claire and Sherry board a train to escape with Leon. The crew finally escape the nightmare and on the outskirts of Raccoon City vow to continue their fight against Umbrella.

Resident Evil 3 Continued

Elsewhere in Raccoon City, Jill Valentine is infected with the T-Virus. Fortunately, Carlos Oliveria, a merc hired by Umbrella is on the scene to not only cure Jill, but help find the vaccine. At this point our heroes find out the unfortunate news that the U.S Government plans to wipe out Raccoon City with a missile strike, hoping to eradicate the infection.

Carlos and Jill head to ANOTHER underground lab, this time creatively called NEST 2. Unfortunately, Nemesis is still alive and very much still in pursuit. The two manage to take out the abomination once and for all, and with the vaccine sample in hand manage to escape the city before the missile strike.

Unfortunately, Nicholai, Carlos's former colleague turned secret operative is waiting and manages to destroy the vaccine vial. Jill and Carl beat Nicholai, and escape just before the missile arrives to completely floor Raccoon. And as expected, our hero vows to take down Umbrella...

Red Dead : Redemption 2

Realistic cattleman story

Red Dead Redemption 2 is a critically acclaimed and commercially successful video game that has received widespread praise for its immersive gameplay, stunning graphics, and compelling story. Set in the late 1800s, the game follows the story of Arthur Morgan, a member of the Van der Linde gang, as he navigates the harsh realities of the dying Wild West. Throughout the game, players are treated to a rich and complex plot that is filled with twists and turns, heartbreak and triumph, and a cast of well-developed and fully realized characters.

create character

The strength of Red Dead Redemption 2's plot is its complex and multi-faceted characters. Arthur Morgan is a complex and deeply flawed protagonist, and players are allowed to see him at his best and worst. He is a man who has made mistakes in his past, and the game does not shy away from exploring those mistakes and their consequences. Throughout the game, Arthur is forced to confront his demons and make difficult choices, and players are left to decide for themselves whether or not he is a hero or a villain.

The other members of the Van der Linde gang are equally well-developed and fully realized. Each character has a unique personality, backstory, and motivations, and the relationships between the members of the gang are complex and nuanced. As the game progresses, players will see the gang members face challenges and make difficult decisions, and the bonds between them are tested and strained.

members face challenges and make difficult decisions, and the bonds between them are tested and strained.

plot

The plot of Red Dead Redemption 2 is also notable for its themes and commentary on the changing nature of the Wild West. As the game begins, the gang is on the run from the law, and they are struggling to survive in a world that is quickly changing and modernizing. The game explores the impact of these changes on the characters and their way of life, and it raises interesting questions about the role of the outlaw in a changing world.

In addition to its well-developed characters and themes, Red Dead Redemption 2's plot is also full of twists and turns that keep players engaged and invested in the story. The game does an excellent job of building tension and suspense, and it is filled with memorable and emotionally impactful moments. Whether it's Arthur's confrontations with his morality, or the gang's struggles to stay alive in the face of overwhelming odds, there is never a dull moment in Red Dead Redemption 2.

details

Red Dead Redemption 2 apart from other games is the level of detail and care that has been put into every aspect of the game. From the intricate character models and lifelike animations to the vast, open world that players can explore, every aspect of the game has been crafted with a level of detail that is truly impressive.

Enjoy your trip out
west!

The game's graphics are stunning, with detailed character models, realistic lighting and shadow effects, and breathtaking vistas that truly bring the world of the American Old West to life. The game's sound design is equally impressive, with a sweeping soundtrack that perfectly captures the mood of the game and realistic sound effects that add to the immersion.

The world of Red Dead Redemption 2 is vast and varied, with a range of environments to explore, from the rolling hills and forests of the countryside to the bustling streets of the city. The game's open world is filled with things to see and do, from hunting and fishing to participating in activities like poker and blackjack. Players can also interact with the world in a variety of ways, such as completing quests, taking on challenges, and interacting with the various non-playable characters that populate the world.

historical restoration

Red Dead Redemption 2 is a game that truly stands out in terms of its historical restoration. The game is set in the American Old West, and the developers have gone to great lengths to accurately depict the time period and the various environments that players will encounter.

One of the standout features of the game's historical restoration is the attention to detail that has been put into the various locations that players can visit. From the bustling streets of the city to the rolling hills and forests of the countryside, each location has been carefully crafted to accurately represent the time period. The game's character models and costumes are also authentic and accurate, adding to the sense of immersion.

Players can explore a variety of environments in Red Dead Redemption 2, each with their own unique characteristics and features. The game's open world is vast and varied, with a range of landscapes and environments to explore, from the lush forests and rolling hills of the countryside to the bustling streets of

the city. Each location has been carefully crafted to accurately depict the time period, with authentic architecture, vehicles, and other details that help to bring the world to life.

graphics

One of the standout features of the game's graphics is the attention to detail that has been put into every aspect of the game. The game's character models are some of the most detailed and realistic in any game, with intricate facial expressions and lifelike animations that truly bring the characters to life. The game's environments are equally impressive, with detailed textures and realistic lighting and shadow effects that help to bring the world to life.

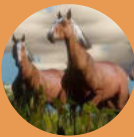

In addition to the game's detailed character models and environments, the game's lighting and shadow effects are also top-notch. The game's use of realistic lighting and shadow effects helps to create a sense of immersion and adds to the overall atmosphere of the game.

The game's grasslands look incredibly realistic, with tall grasses and flowers on the ground that are finely detailed, giving players a sense of being right there in the game world. In addition, the skies in the game are beautiful, with realistic clouds and starry nights visible both during the day and at night.

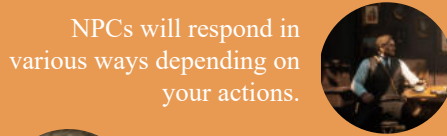

Overall, Red Dead Redemption 2's plot is a masterclass in storytelling and character development. Its immersive world, complex characters, and compelling themes make it a must-play for any fan of video games, and its place as one of the best narrative games of all time is well-deserved.

Teardown

Best mods for the destruction sandbox

Teardown is already a brilliant sandbox of voxel destruction, filled with maps and missions where to complete a series of heists you're gonna have to creatively destroy everything from wooden sheds to concrete walls to entire brick buildings. Your tools begin with a sledgehammer but grow to include blowtorches and bombs, everything you need to either carefully plan and pull off mission or just mess around and knock things over in freeform sandbox mode.

But no matter how great a game is, it can always be improved by mods, and there are tons of fun additions modders have hammered into the game over the past couple of years. What's especially cool with Teardown isn't just that mods are a single click to subscribe to on the Steam Workshop, but a menu within the game itself highlights more great mods you can install right then and there while you're playing. Modding your copy of Teardown is just so darn easy, with none of the headaches that often come with modding games.

button to rip and tear the scenery, but the right mouse button lets you fire a grappling hook. Want to get to the top of a skyscraper quickly? Just latch onto it and click the button again, and you'll be pulled through the air toward it. Landing safely... well, that's trickier.

That's not the only modded tool that acts as quick transportation. Another gaming classic has been brought into Teardown, the Portal Gun mod created by Mathias.

NEED TO KNOW

RELEASE
April 21, 2022

DEVELOPER
Tuxedo Labs

PUBLISHER
In-house

LINK
teardowngame.com

You know Portal, right? Left click places a blue portal, right click places an orange portal, and you can jump into one and pop out the other, just like in the actual game. And another Valve classic, the gravity gun, has been modded in by Thomasims. It's great for picking up objects like crates and barrels and then launching them through windows and doors, just like Gordon Freeman does. It's also a safe way (if you're careful) to pick up explosive canisters and send them flying into things you want to destroy.

Maybe you're more in the mood for a Doom weapon than a Half-Life one. While developer Tuxedo Labs added its own minigun mod, the one created by My Cresta is even better, chewing up the scenery with a frenzy of bullets and keeping track of how many rounds you've fired with a little odometer on your screen. Ever cut down a skyscraper with a minigun before? I highly recommend it. And if you want a more colourful form of destruction, you can dual-wield the superpowers of Polka-Dot Man from The Suicide Squad with the Polkadot Gun mod by el Boydo. Stick out your arms and a blizzard of colourful dots will spray forth and absolutely

TOP: Perfectly simulated destruction effects. Only some villagers will be left homeless
RIGHT: The quiet quite village before you destroyed it.

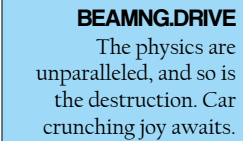

BULK SMASH

Games that are filled with destruction

WRECKFEST

A racing game where the goal isn't just to come first, but to destroy as much as possible.

BEAMNG.DRIVE

The physics are unparalleled, and so is the destruction. Car crunching joy awaits.

ABRISS

Construct huge machines and put them to work knocking down everything in sight.

BOOMSTICKS AND BOMBS

When you want to mess something up, it's best to start with some weapons, and loads of fun guns and other tools have been modded into Teardown, many of them from other games. If you're looking for a multipurpose tool that can do some damage and also get you around the map, you'll want to get your hands on the Hook Shotgun mod by My Cresta. It's inspired by Doom Eternal's Meat Hook: a deadly shotgun with a grappling hook welded to it. Blast away with the left mouse

devour whatever is in front of you. For a completely different way to ruin the blocky world of Teardown, try out the Gun mod by Laz. It sprays an arc of green goop that will start dissolving whatever it lands on. Melt some cars. Dissolve some doors. Spray a rooftop and watch it eat its way down through a building, floor by floor. It's fun!

And then there's good old C4, a mod by Punished Bayonetta. You know the drill. Run around planting explosive packs here and there, and then find a safe place to stand while you detonate them. You can stack 'em in one place for an extremely big boom or spread them out to create a chain of explosions. The mod lets you change the size of the explosion from small to huge, and another setting lets you change the time delay between detonations.

OPPOSITES ATTRACT

When you get tired of blowing things up, try sticking things together. The Magnetizer mod by Mi1 puts a big, cartoony magnet in your hands. Point it at one thing (like a car) and click, then point it at another thing (like another car) and click. Now those two cars are magnetized and will be instantly (and violently) attracted to each other. Click more things and they'll sail through the air and stick to the mangled mass of steel, too. In moments you can reduce an entire parking lot into a giant ball of barely recognizable car parts. The magnet's power can be adjusted by sliders, and you can make objects repel each other instead of attracting.

If you're a fan of even more offbeat weapons, here's one you don't see in shooters all that often: a wand that summons pianos. Piano Fall by Jiffy Up isn't some one-note joke, either. Yeah, it's funny to make a piano fall from the sky onto something, especially with a loud jangly sound as the piano smashes into the ground. But you can press and hold the mouse button to charge the drop, so it's not merely falling but rocketing towards the ground. You can also hold both mouse buttons to create a rain of pianos anywhere you point

your baton, and you can toggle whether you want the falling pianos to be falling explosive pianos. Take the Piano Drop mod into a sandbox map, find a great vantage point, and you can carpet bomb the entire place with exploding pianos in seconds (if your GPU is up to it, naturally).

And speaking of death from above, there's no better way to destroy something on the ground than with a big rock from outer space. Asteroid Strike by tislerricsm lets you click a place on the map and then watch a meteor plummet down from the heavens and utterly wreck whatever it hits. If a cloud of pianos slowed your fps to a crawl, I'd suggest sticking to one asteroid at a time, because wow. My game of Teardown just became a PowerPoint presentation. Still, it's spectacular watching an entire skyscraper eat it when the meteor hits, even if it slows everything to a crawl.

Now that you've got a bunch of cool weapon mods installed, you may be interested in something to shoot, smash, and explode other than just Teardown's scenery. How about a Tyrannosaurus Rex? The TeaRex mod by tislerricsm lets you spawn the tremendous dinosaur on its own woodsy map or on any sandbox map you want. Just be aware it's not a cuddly fella. The T-rex will immediately issue its trademark Jurassic Park roar and begin stomping its way after you, smashing most obstructions in its way. While it's not lightning fast it's still got enough speed to catch you, so either

DEATH FROM ABOVE

bring one of those guns I mentioned earlier or stick to the high ground where it can't get you.

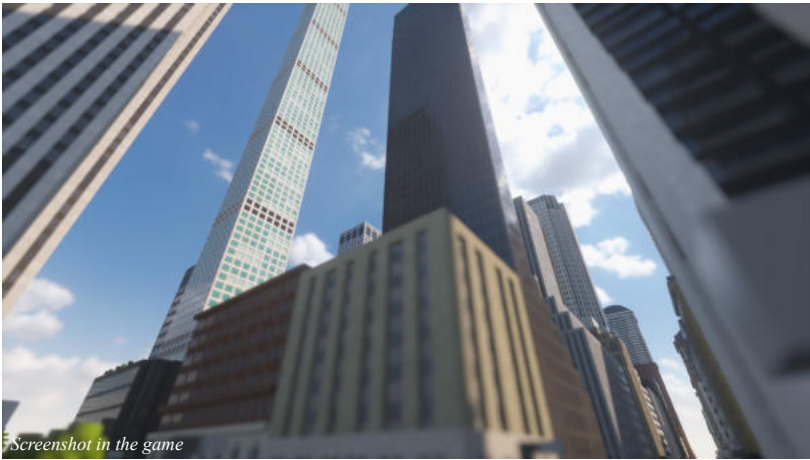

An even bigger threat to you (and the objects of whichever map you're standing in) is the Colossus Attack mod (yet again made by tislerricsm). This metal monstrosity is like a junkyard crushing machine on legs, demolishing anything in its way. If you're even more foolhardy you can spawn it with a turret that'll fire at you once it spots you, but it's plenty destructive enough on its own simply by mowing things down with its massive spider legs. And if you really want to tempt fate, try the Basilisco V2 mod. Imagine a flying aircraft carrier that looks like a giant metal insect and is armed with lasers, a railgun, missiles and even a nuke. This airborne nightmare only wants to do one thing: kill you. And that it does, almost immediately after spotting you. So if you want to survive, stick to cover or you'll be dead almost instantly.

As far as maps go, there are lots of great ones added by modders, too. One of the most surprising maps is Boeing 737 by Offensive.PDF. I loaded it up and walked around inside the passenger jet for a bit, then cheerily shot at the walls with my minigun. Then I was sucked out of the hole. I didn't realize the map spawned the plane in the air, complete with decompression physics. It was a shock. Speaking of high-speed winds, Tornado Trailer Park by Battlebob72 is also a gas. There's all sorts of vehicles and motor homes to destroy with your own tornado. Yep, you can actually drive the tornado, speed it up and slow it down, and steer it across the map, watching everything get sucked up and spun around. Or just set it off and watch as it devours everything in its path. Yet another great way to destroy things in Teardown.

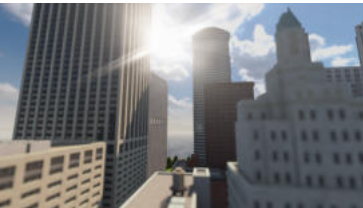

By Wu Yanzhou

RIGHT&LEFT: Exquisite and beautiful official level's maps. At the same time a wide range of props allow you to get through the levels in the way you want.

THE EDGERUNNERS SAVED CYBERPUNK

How the derivative anime Cyberpunk: Edgerunners got overwhelmingly positive and saved the game Cyberpunk 2077

By Kong Jincan

The derivative anime Cyberpunk: Edgerunners gained overwhelmingly positive once it was released. The success of this Netflix's anime had led to a resurgence for Cyberpunk 2077. According to reports, by the end of September 2022, which was the month when the Edgerunners was released, the number of online users in 2077 games had been exploded. The number of concurrent players on Steam once exceeded 100,000 at the same time. At the same time, CD Projekt, the developer of 2077, also took advantage of the popularity of edgerunner to discount 2077, which promoted the sales of 2077. As of December 28, 2022, Edgerunners is still 100% fresh on Rotten Tomatoes and has a high score of 8.3 on IMDb.

THE DISAPPOINTING 2077

Cyberpunk 2077's tumultuous launch is forever etched into gamers' memories worldwide. The plethora of bugs and glitches that were glaring in the early versions of the game were enough to prompt developer CD Projekt Red into making a full-blown apology, pledging to put these errors right and continuously improve the game. Even two years after the game's release, 2077 still hasn't lived up to players' expectations. "The main plot of Cyberpunk 2077 is like a plate of lobster ruined by bad cooking skills. The main plot is nearing the end when you think it just started, and its completion is ridiculously low. Many details in the game are It reveals that the main plot should have been longer and more exciting," said Kevin, who claimed to be an avid fan of Cyberpunk 2077.

WHAT MAKES EDGERUNNERS SO SUCCESSFUL?

ATTRACTIVE WORLDVIEW

Cyberpunk sets in a dystopian future where technology has advanced to unimaginable levels, the game offers a unique and attractive worldview that is both exciting and thought-provoking. Night City, the main stage of Edgerunners, is a hub of advanced technology, where corporations wield enormous power and the streets are ruled by various criminal factions. One of the most appealing aspects of Cyberpunk is its depiction of a world where technology has fundamentally changed the way people live. In this future, people can

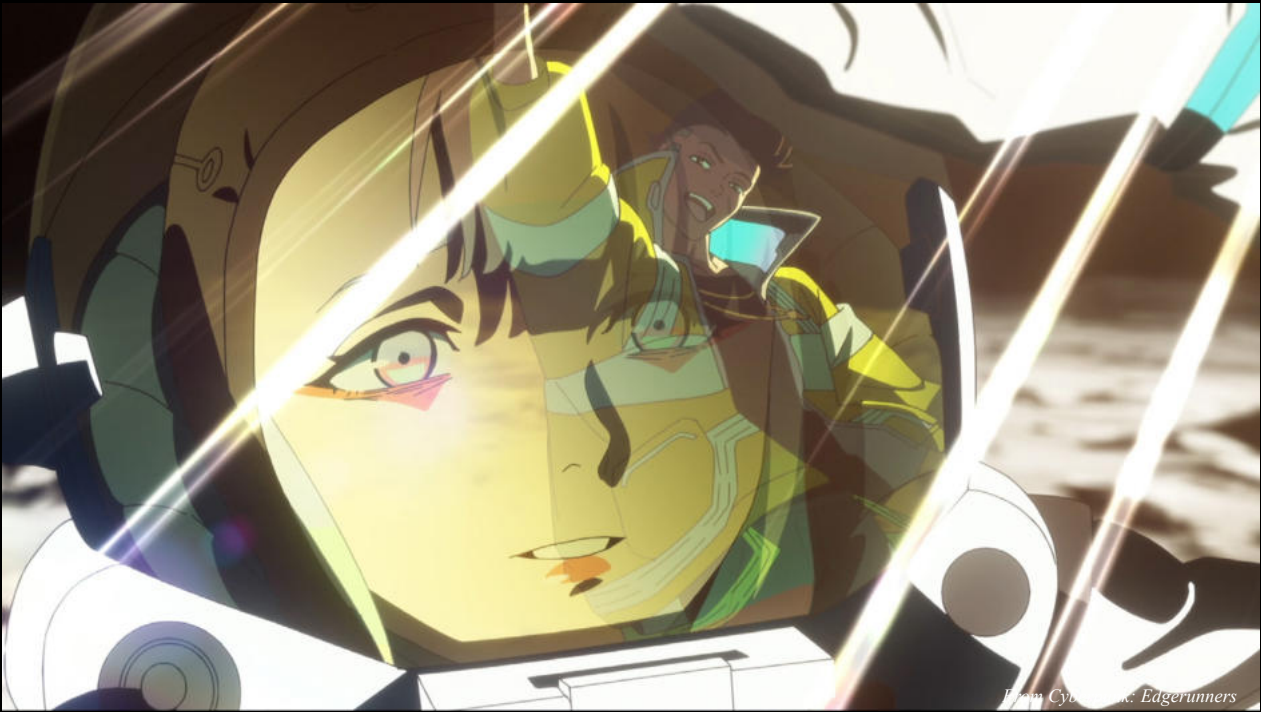

augment their bodies with advanced cybernetic implants that give them superhuman abilities. These implants allow people to hack into computer systems, enhance their physical strength and speed, and even connect directly to the internet.

This technology has also led to the rise of 'braindances,' virtual reality experiences that allow people to experience the thoughts, feelings, and sensations of others. These braindances are used for everything from entertainment to education, and have become a major part of life in Night City.

However, this advanced technology also comes with a dark side. The corporations that control the technology have enormous power, and they are not afraid to use it to further their own interests. As a result, Night City is a place of great inequality, where the rich and powerful live in luxury while the poor struggle to survive in the city's slums.

By Kong Jincan

"I never thought that Cyberpunk: Edgerunners, as a prequel to the game Cyberpunk 2077, could be so much better than the game itself and even led to a resurgence for 2077."

_spicyzhu

"We are just like the hero David, we all have a mother who will try her best to provide the best education, we have no goals in life and only live for others, we all obey the numb life like animals, want to struggle but to no avail."

_Giggity

"The show is easily the best anime I've ever seen, the characters are all well written, the original dubbing is good and the animation style is amazing. What grants it a crown, other than the plot, it's how it shows a well know world (the Cyberpunk world) and it managez to introduce people that have never heard of the game to this amazing world."

_ITALUKE

Hideo Kojima

How did the guy become
an artistic game
"LEGEND"

BY LI YINGKAI

Hideo Kojima is a name that is synonymous with the video game industry. He is a game designer, director, and producer who is best known for creating the Metal Gear series, one of the most influential and successful video game franchises of all time.

His Death Stranding Director's cut present more whimsy, more perfect mechanism, and his concept of game filmization from beginning to end.

Early Days:

Kojima was born on August 24, 1963, in Setagaya, Tokyo, Japan. As a child, he was heavily influenced by science fiction and action movies, which would later shape his creative vision as a game designer. He became interested in video games as a teenager, and began to create his own games using a home computer.

After finishing high school, Kojima enrolled in Tokyo Art College, where he studied film and literature. While at college, he worked as a part-time employee at a video game company called Konami. In 1986, after graduating from college, he was hired by Konami as a full-time employee and began working on his first video game, "Metal Gear," which was released in 1987 for the Nintendo Entertainment System (NES).

"Metal Gear" was an instant hit, and Kojima quickly became known as a talented and innovative game designer. The game's unique blend of stealth gameplay, deep storytelling, and complex characters set it apart from other games of the time, and it became a critical and commercial success. Kojima followed up the success of "Metal Gear" with a sequel, "Metal Gear 2: Solid Snake," which was released in 1990 for the MSX2 computer platform.

Throughout the 1990s and 2000s, Kojima continued to work on the Metal Gear series, creating new games and expanding the franchise with spin-off titles. He also worked on other projects, including "Snatcher" (a science fiction adventure game) and "Policenauts" (a point-and-click adventure game).

More Than the "Metal Gear":

Eschewing the trigger-happy, arcade-style gameplay of other action titles, Metal Gear instead favored the use of stealth and ingenuity, with violence as a last resort, as tools for infiltrating the game's fortress and disarming a nuclear threat. Kojima also used his love of American action films and TV shows to give Metal Gear a cinematic narrative largely unseen in games outside the fantasy/role-playing genres.

In addition to his work as a game designer, Kojima is known for his innovative use of technology in video games. He has always been interested in pushing the boundaries of what is possible in the medium, and has made use of cutting-edge technology to enhance the gameplay and storytelling of his games.

For example, in the Metal Gear Solid series (which began in 1998), Kojima made use of 3D graphics and voice acting to create a more immersive gaming experience. He also introduced new gameplay mechanics, such as the ability to hide in shadows and sneak past enemies, which helped to establish the "stealth" genre of video games.

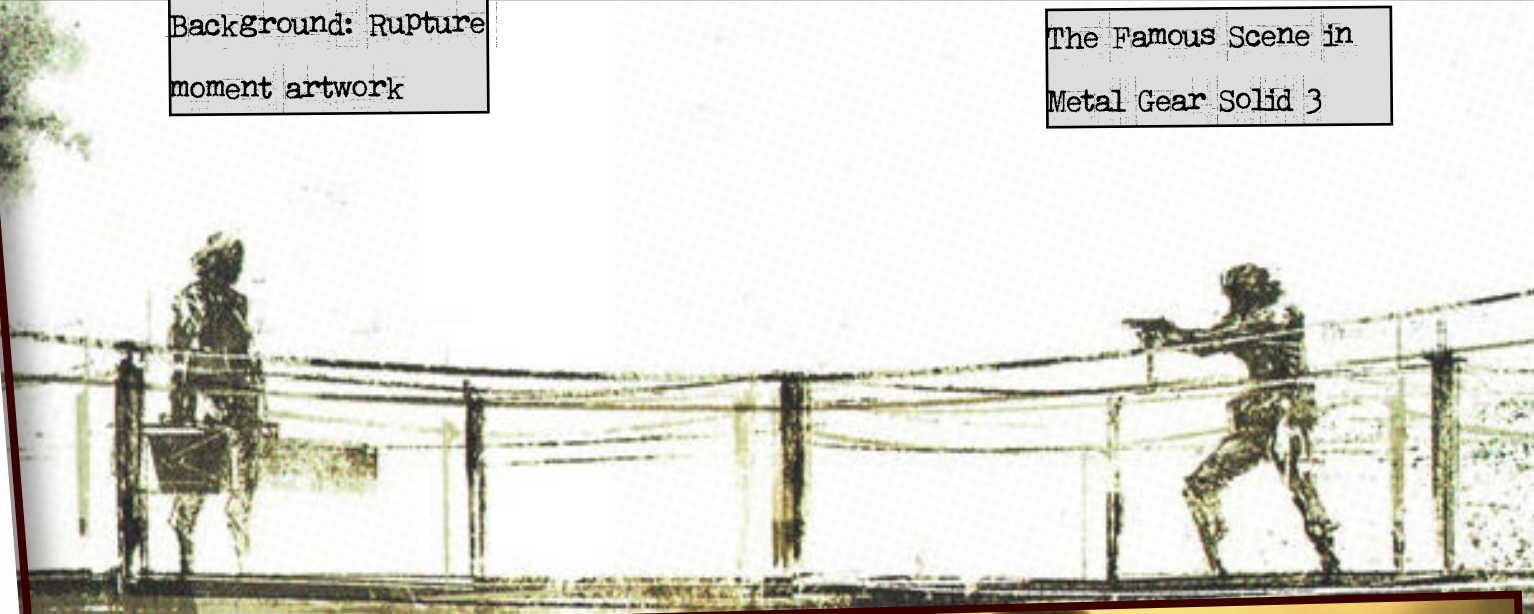

What I'm doing is creating a game. I'm not making a movie. To make the game more enjoyable and captivating, and to make the player feel like he's present in that setting, we need the cinematic element.

-Hideo Kojima

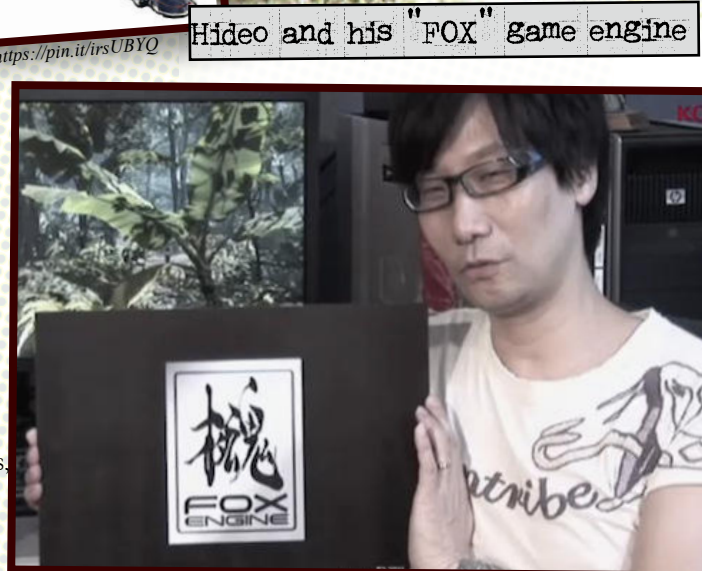

Solid Snake in MGS 2

Background: Rupture moment artwork

The Famous Scene in Metal Gear Solid 3

Hideo and his "FOX" game engine

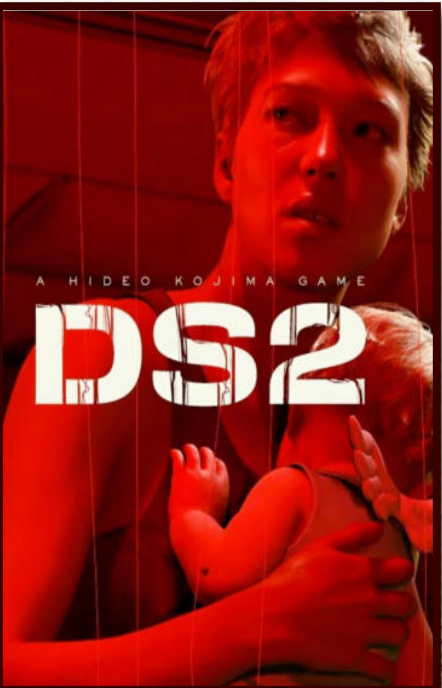

KONAMI CORPS.

Kojima is also famous for his attention to detail and his commitment to creating rich, complex stories in his games. The Metal Gear series, in particular, is known for its intricate plotlines and well-developed characters, and Kojima has always been heavily involved in the writing and storytelling of his games.

In addition to his work in the video game industry, he is also a vocal advocate for the importance of video games as an art form. He has frequently spoken out about the potential of video games to tell powerful, meaningful stories and to challenge players to think deeply about the world. He often includes references to movies and other pop culture phenomena in his games, which adds an extra layer of fun for fans.

Whoever played MGS5 will remember David Bowie's "The Man Who Sold the World", Afghan desert of desolation, and the lonely Big Boss.

Above: Kojima Productions.

There are many museums dedicated to technology, artistic endeavors, music, and that sort of thing. From that perspective, I think games really do have a place as a kind of collaborative art or a synthesis of all these various aspects into a whole and that in itself can be perceived as art. For games you can't really do that because they're interactive. I think as someone who's creating a game, you have to keep that interactivity in mind. You can't completely push your vision on the player.

-Hideo Kojima

"Legend" To be continued

Hideo Kojima's Death Stranding editor's cut is a testament to his status as one of the most influential and respected figures in the video game industry. His work has consistently pushed the boundaries of what is possible in the medium, and this latest release is no exception.

From the ground-breaking gameplay mechanics to the deep, meaningful storytelling, Death Stranding is a true masterpiece of the video game art form. The attention to detail and immersive world-building are simply breathtaking, and the performances of the cast, led by Norman Reedus and Mads Mikkelsen, are nothing short of phenomenal.

It's no surprise that Death Stranding has already won numerous awards and accolades, and it's likely that it will continue to do so in the future. Kojima's innovative vision and dedication to his craft are truly unmatched, and it's clear that he is an artistic genius who has helped to shape the direction of the industry.

For fans of Kojima and the video game industry as a whole, the Death Stranding editor's cut is a must-play. It's a groundbreaking, thought-provoking, and emotionally powerful experience that will stay with you long after the credits roll.

After we reviewed our annual award for the Director's Cut, Kojima and his studio have officially announced the upcoming release of DS2. Details about Death Stranding 2 are scarce, but fans are eagerly anticipating the release of the highly anticipated follow-up. Kojima never disappoints, and we hope that the new world view of stranding world will bring us more legend and more surprise.

HOPE
AND
HOMES
FOR
CHILDREN

URGENT APPEAL

Russia's brutal invasion of Ukraine is not just a humanitarian crisis for the Ukrainian people; it's a child protection emergency.

Up to 100,000 children warehoused in Ukraine's vast orphanage system – a network of over 700 buildings – risk being forgotten. Left to face the dangers of war alone as staff flee. As families are torn apart or forced from their homes, many more children are at risk of being separated from the love and protection they desperately need. Worse still, they are at risk of trafficking, or being placed in overcrowded, understaffed and poorly resourced orphanages in border countries.

We must act now.

Born out of the Balkans conflict 30 years ago, we've championed the vital importance of family and community-based care of children and our teams are on the ground in Ukraine, Moldova and Romania to ensure this war does not rob children of the love and protection they need now more than ever. Across all three countries, we're directly supporting displaced families and unaccompanied children with material

and emotional support. We're working closely with authorities to keep families together when they are at their most vulnerable and to fight for the safe tracking, monitoring and care for children without parental care. And we won't stop when the fighting stops.

Will you help us by donating?

With your help, we can avert a child protection crisis of epic proportions and ensure children are protected and kept in families. Never orphanages.

To help protect vulnerable children, donate online at: www.hopeandhomes.org/donate. Or call **01722 790 111** Monday – Friday 9am – 5pm.

Please quote **FP22 - G&E** when making your donation.

In the event that funds raised exceed what is needed to deliver Hope and Homes for Children immediate and longer-term response to this crisis, we will use donations where the need is greatest.

PAPER POWER

65% of the energy demand at U.S. pulp, paper and paper-based packaging mills is met using renewable, carbon-neutral biomass energy.
